

MaRIONet

The UK Manycore Network

A graphic to the right of the text, consisting of a cluster of green squares with yellow centers, connected by thin orange lines, resembling a network or a map of the United Kingdom.

Welcome to the launch meeting of the UK Manycore Network. The Manycore Research, Innovation and Opportunities Network is funded by EPSRC throughout 2016-19. Our aim is to enhance the capability of the UK manycore research community through focused engagement of academic and industrial researchers.

At this initial event we will assess the current state of manycore research and plan our coordinated actions for the next few years.

We are delighted to invite you to the **event dinner** which will take place from **17:30** today

the address of the restaurant will be announced at the close of the meeting

at a location nearby Imperial College, Huxley Building.

With compliments of the project coordination team in Glasgow.
